- Playfully explore aspects of hemisphere, eye, ear, hand, and foot specialization (dominance)
- Learn to assess adults' and children's brain organization profiles (and your own)
- Understand the effects each organization profile has on reading, writing, hearing, vision, motivation, and social skills -- and what to do about it
- Learn nine new "Energy Exercise Variations" to add to your learning menu
- Unlock the mysteries of odd pencil-grip positions, and what they mean in regard to brain organization
- Partner for the "Dexterity Balance" to address motor dexterity, sense of left and right, and ability to discern distinctions while seeing the big picture
- Experience how Brain Gym balancing helps provide access to our gifts and resources
- Come away with insights, tools, and information you'll be very glad you have!

Recommended Resource: To work with the OBO material most easily, I recommend

- *The Dominance Factor*, by Carla Hannaford, Ph.D. This book fully describes all 32 brain organization profiles and offers information for understanding their challenges and benefits. Available for purchase during class.

This course is part of the Brain Gym® instructor licensure curriculum.
